We change any existing tile, thatch or zinc roof to a Metrotile roof.

Metrotile is a high performance stone coated, steel roofing solution for a lifetime, with a 50 year guarantee.

Extreme weather resistance, (UV protected) fire retardant and durable. No maintenance.

We all love the atmosphere of a thatch roof, especially in the bush, but it has many disadvantages as a roof cover eg. damage by birds and monkeys, fire risk and high maintenance, to name a few. Our product however have the lifespan, the look, are lightweight and can be installed over existing thatch or as a new roof with a thatch or reed ceiling. Best of both worlds, means retaining the authentic ambience on the inside, but without the hassle and risk of the thatch on the outside. Re-roofing over thatch with our product, will also save at least

30% on your insurance premiums. Without the thatch it will be insured as a normal tile roof.

Metrotile are accessible in over 80 countries worldwide. Improved market share growth annually due to our positioning to drive quality and price, combined with an excellent, technical service and diversification of our product line.

No project are to big or to small for us to complete, contact us for a free quotation. We will beat any written quote from any registered business. With 20 years experience, using the same contact info and the same company name, you don't have to think twice to give us a call today. We do work, across South Africa.
